

Speeding up cities and regions' adaptation and mitigation to climate change through the procurement of climate services using earth observation data

PROTECT in a nutshell...

PROTECT is a two-year EU-funded project aiming to bring together leading European cities and regions willing to **procure climate services solutions using Earth-Observation data to adapt to and mitigate the effects of climate change** and achieve their climate policies and actions.

- PROTECT will prepare the ground for a **Pre-Commercial Procurement (PCP)** – an innovation procurement approach that enables the public sector to **steer the development of new solutions directly towards its needs**, even before their market entry.
- Through PROTECT, **procurers facing similar challenges related to climate change will be connected and accompanied** in the definition of their specific needs for climate services in 5 selected domains.

Land use and
marine
environment

Utilities

Green
communities

Circular and
bio economy

Civil security
protection

Why should you contribute to the PROTECT project?

- Assistance in **defining and aggregating clear and realistic needs** for climate services
- **Experience sharing and good practice transfer** with procurement peers from all over the EU
- **Targeted training, continuous knowledge and fresh information** on Earth Observation, climate services and innovation procurement
- **Insights into climate services market providers'** existing and future solutions and technologies
- **Strategic positioning** for participating in the upcoming PCP

Who can benefit from PROTECT?

Cities, regions and other procurement organisations interested in the potential uptake of climate services through a PCP

SMES, companies and developers with ideas for innovative or disruptive climate services that help adapt and mitigate the effects of climate change

Stakeholder initiatives facilitating the development of climate services through the provision and use of Earth-Observation data

Key dates for the project
